Sizewell B

Sizewell Stakeholder Group Meeting

Thursday 19 April 2018

Safety performance and staffing

During the period of the report there has been:

- **No lost time injuries to staff**
- **No nuclear reportable incidents**
- **No environmental incidents**

- **545 EDF Energy staff includes 16 Apprentices, 3 trainees, 3 Industrial Placements**
- **250 year round contracting partners**

Steam Generator work during refuelling outage 15

- On 31 January 2018 Sizewell B power station returned to service following its fifteenth planned refuelling and maintenance outage
- Shutdown was extended to allow repairs to our steam generators.
- Maintenance inspections, repairs and testing on all four steam generators took place.

Turbine Generator 2 pipework repair

- On 20 February 2018 Turbine Generator 2 was brought offline to complete a repair to a section of pipework.
- Monitoring detected a small hydrogen leak, on original components of the turbine and a conservative decision was made to take the turbine offline to complete the repair.
- Turbine Generator 1 was not affected and continued to supply power to over 1 million homes and businesses.
- Turbine Generator 2 was returned to service on 05 March following the repair to a section of its pipework.

International review confirms good safety practice at Sizewell B

- International Atomic Energy Agency (IAEA) has confirmed the successful completion of its review of Sizewell B.
- Operational Safety Review Team (OSART) concluded the mission had been successful after the follow-up mission to Sizewell B nuclear power station in April 2017.
- The Department for Business, Energy and Industrial Strategy welcomed the follow-up report from the IAEA and congratulated Sizewell B on the number of good practices identified.
- A link to the OSART report and Government response can be found here: <https://www.gov.uk/government/publications/operational-safety-osart-mission-to-sizewell-b-nuclear-power-station-follow-up-report>
